

Granite Arena Stone

Granite Arena Stone

This paver looks beautiful, just like granite. With our Granite Stone pavers, our goal was to bring a rugged granite look to the comfort of your own backyard. In order to transfer the fine texture of the granite on to the paving stone, we digitized a piece of actual stone, copying its surface exactly. The resulting fine surface texture closely resembles the original stone but is less aggressive than our other textured stones, Alpine Stone™ and La Pietra™. Get the natural stone look you love, but in a uniform size and shape for easy laying.

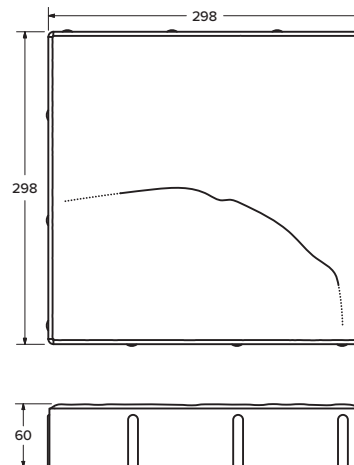

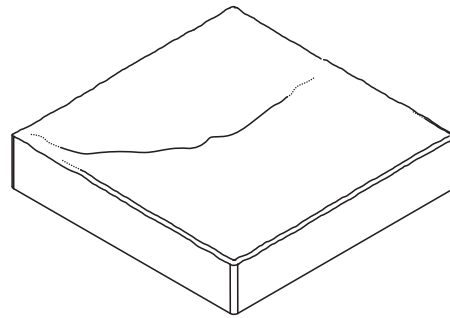

Composition and Manufacture

Granite Arena Stone is made from a low moisture concrete mixture. It is made under high pressure and high frequency vibration, producing a very dense stone, low in water absorption (less than 5%) and high in compressive strength PSI (above 8000). It is designed to meet or exceed ASTM C-936 and ASTM C-67 (freeze/thaw) specifications.

Dimensions:

Thickness: **60mm** (2.36")
Width: **298mm** (11.73")
Length: **298mm** (11.73")
Pcs/SqFt: **1**
Pcs/Pallet: **108**
Approx Wt: **28 lbs/pc**
