

Interstone

Interstone

The most durable paver of them all. Interstone is made for driveways and city streets. That's because this paver has the highest amount of interlock that you can find in its size, and is a favorite for areas vehicles frequent! If you used the 80mm variant, you could even turn a bulldozer around on it without effect.

Composition and Manufacture

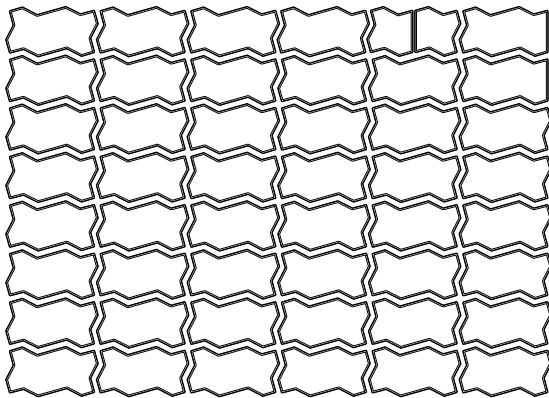

Interstone is made from a low moisture concrete mixture. It is made under high pressure and high frequency vibration, producing a very dense stone, low in water absorption (less than 5%) and high in compressive strength PSI (above 8000). It is designed to meet or exceed ASTM C-936 and ASTM C-67 (freeze/thaw) specifications.

Dimensions:

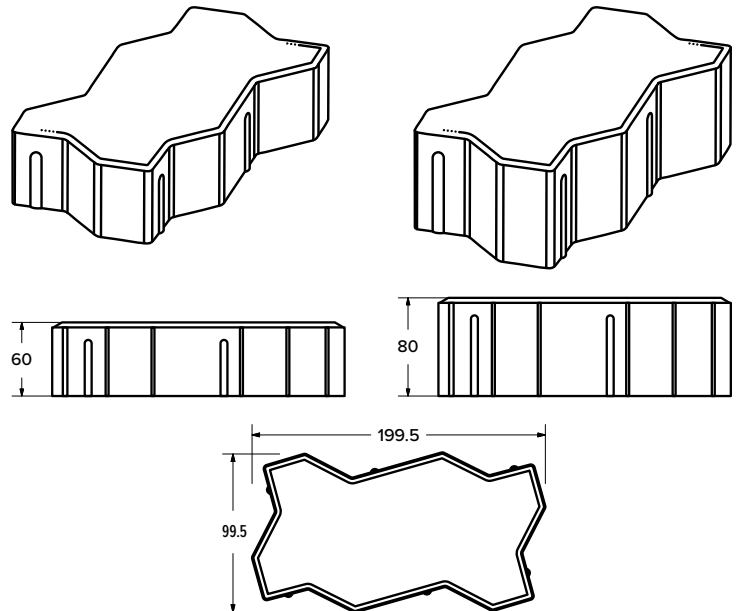

Thickness: **60mm** (2.36")
Width: **112.5mm** (4.375")
Length: **225mm** (8.875")
Pcs/SqFt: **3.6**
Pcs/Pallet: **360**
Approx Wt: **8 lbs/pc**

Thickness: **80mm** (3.15")
Width: **112.5mm** (4.375")
Length: **225mm** (8.875")
Pcs/SqFt: **.33**
Pcs/Pallet: **280**
Approx Wt: **10 lbs/pc**
