

# ALPINE STONE

## Pattern Sheet

**MUSTER K**

Muster K uses 73% rectangles and 27% squares

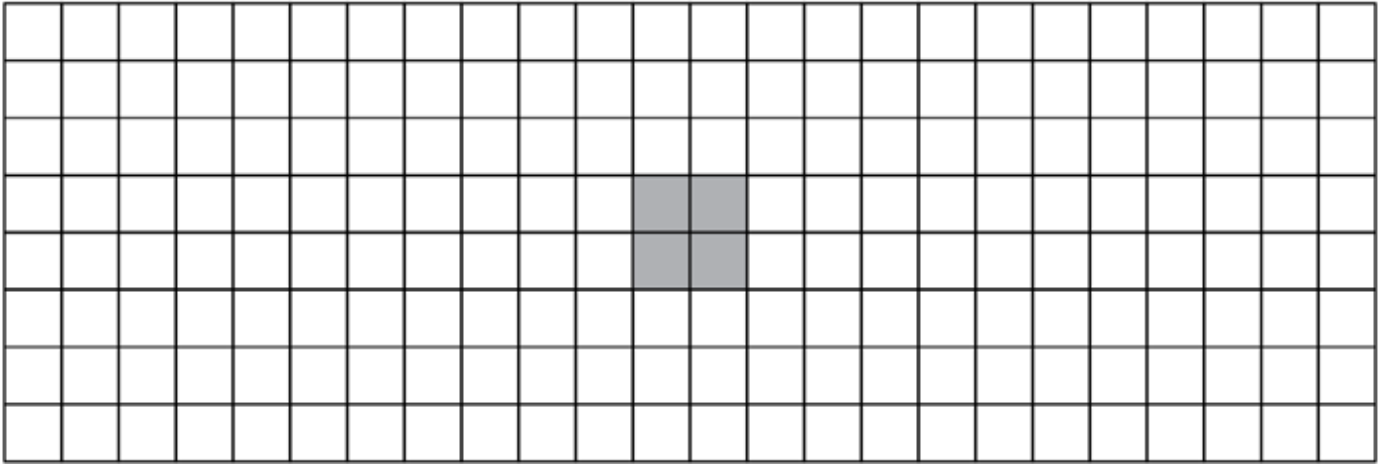

**RANDOM LAYOUT**

Random layouts are commonly used when laying paving stones of various sizes that module together such as the five stone Granite, the five stone Leiden Collection (shown above) and La Pietra™ Quattro. Random layouts are not a pattern. They are literally any placement of the stones in any order.

Two simple tips to ensure that you are laying a true random layout are:

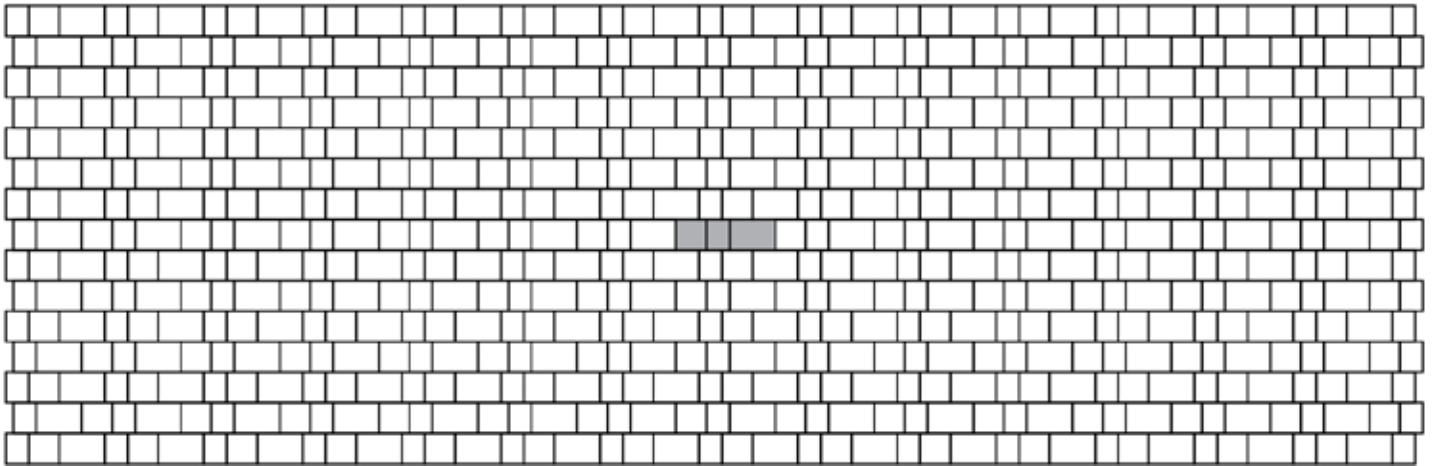

Never have four corners meet

Never have any joint running linearly for more than about nine feet

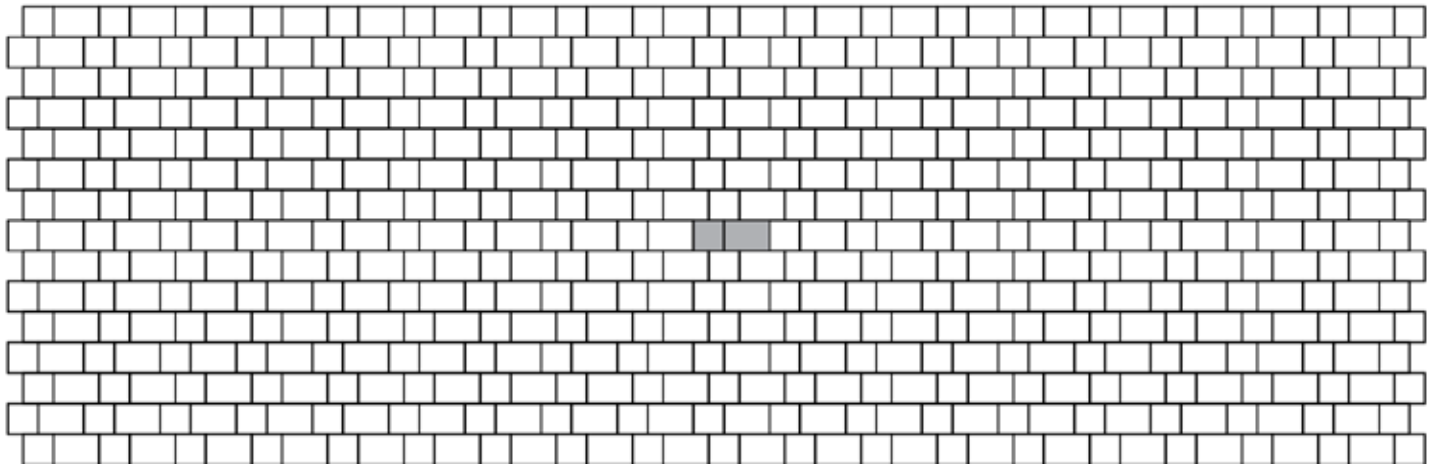

**STACK BOND**

Stack Bond uses 100% of any rectangular or square stone

**THREE STONE RUNNING BOND**

Three stone running bond works with any stone that has three sizes it can module with. It uses 46% large rectangles, 31% squares and 23% small rectangles

### **TWO STONE RUNNING BOND**

Two stone running bond works with any stone that has three sizes it can module with. Typically, it uses 60% large rectangles and 40% squares. If you use squares and small rectangles, the ratio shifts to 60% squares and 40% small rectangles
