

LA PIETRA MODERNA

Pattern Sheet

RANDOM LAYOUT

Random layouts are commonly used when laying paving stones of various sizes that module together such as the five stone Granite, the five stone Leiden Collection (shown above) and La Pietra™ Quattro. Random layouts are not a pattern. They are literally any placement of the stones in any order.

Two simple tips to ensure that you are laying a true random layout are:

Never have four corners meet

Never have any joint running linearly for more than about nine feet
