

Roma Stone™

Roma Stone

Our new Roma Stone™ blends timeless aesthetics with robust performance. With its organic shapes, Roma Stone™ gives pathways, patios, and driveways a very special, natural charm while allowing rainwater to pass through. Each layer contains 12 distinct shapes and sizes in varying quantities for maximum creative options. We recommend installing with SEK X-treme Wide Joint, EasyJoint, or 1/4"-10 gravel.

Composition and Manufacture

Roma Stone™ is made from a low moisture concrete mixture. It is made under high pressure and high frequency vibration, producing a very dense stone, low in water absorption (less than 5%) and high in compressive strength PSI (above 8000). It is designed to meet or exceed ASTM C-936 and ASTM C-67 (freeze/thaw) specifications.
