

La Pietra™ Moderna Grande

La Pietra™ Moderna Grande

A sleek, contemporary take on the La Pietra family. Looking for a modern stone in a larger format? La Pietra Moderna is ideal for a square or rectangular patio. It also pairs well with other smooth-finished pavers, such as those in the Leiden Collection. This family of slabs consists of five basic sizes that all module off of a base of 7, 14, and 21 inches. This stone comes with a beveled edge and is available in the Cambridge, Jamestown, and Umbria blends!

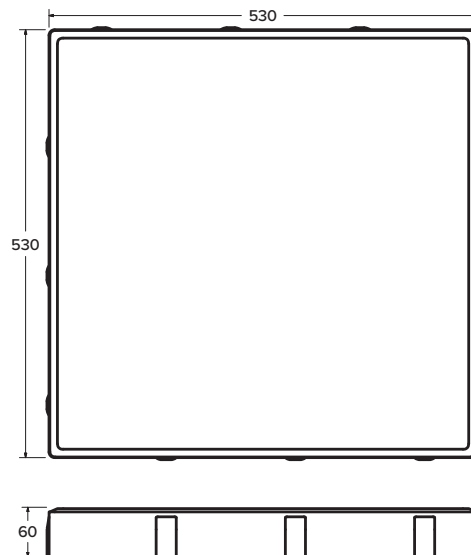

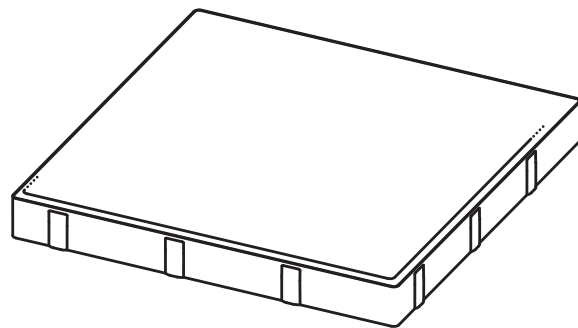

Composition and Manufacture

La Pietra™ Moderna is made from a low moisture concrete mixture. It is made under high pressure and high frequency vibration, producing a very dense stone, low in water absorption (less than 5%) and high in compressive strength PSI (above 8000). It is designed to meet or exceed ASTM C-936 and ASTM C-67 (freeze/thaw) specifications.

Dimensions:

Thickness: **60mm** (2.36")
Width: **530mm** (20.87")
Length: **530mm** (20.87")
Pcs/SqFt: **.33**
Pcs/Pallet: **20**
Approx Wt: **84 lbs/pc**
