

Roca Park Stone

Roca Park Stone

The paver with a tumbled, rugged appeal. Roca Park Stones offer a unique surface treatment produced by individually tumbling the stones. Roca Park Stone have a broken edge with rugged looks that are available in an array of colors. By combining Roca Park, Roca Plaza, and our Roca Holland you can create a design that is truly unique.

Composition and Manufacture

Roca Plaza Stone is made from a low moisture concrete mixture. It is made under high pressure and high frequency vibration, producing a very dense stone, low in water absorption (less than 5%) and high in compressive strength PSI (above 8000). It is designed to meet or exceed ASTM C-936 and ASTM C-67 (freeze/thaw) specifications.
