

Milana™ Stone

Milana™ Stone

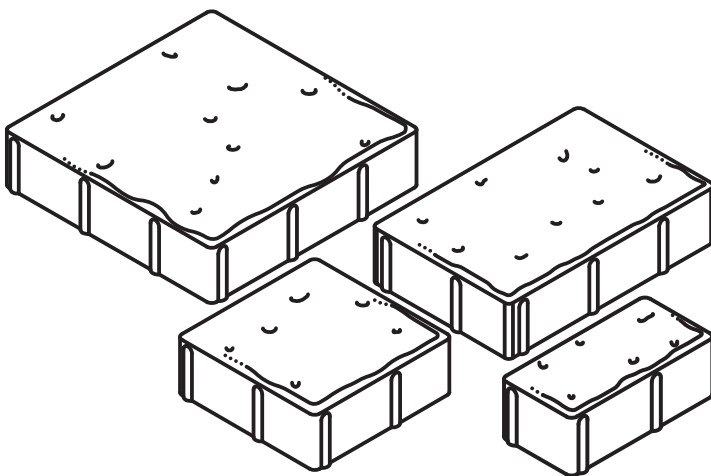

We've taken the module of our Alpine Stone and added the rippled surface from our Roma Stone™. The result ended up looking pretty much exactly like the ancient stones on the streets of old-town Milan. So if you're looking for a textured paver for your next driveway project, look no further than Milana™ Stone.

We've also bumped up the thickness to 80mm to better mesh with our other vehicular traffic products. For those soggy winter projects, we've increased the thickness of the spacer bars to allow for the use of modern wet-sweep polymeric sands.

Composition and Manufacture

Milana™ Stone is made from a low moisture concrete mixture. It is made under high pressure and high frequency vibration, producing a very dense stone, low in water absorption and high in compressive strength PSI (above 3000). It is designed to meet or exceed ASTM C-1372 specifications and ASTM test methods C-140 and C-1262.

Dimensions:

Large Square

Thickness: **80mm** (3.125")
Width: **328mm** (12.91")
Length: **328mm** (12.91")
Pcs/SqFt: **.85**
Approx Wt: **41 lbs/pc**

Large Rectangle

Thickness: **80mm** (3.125")
Width: **328mm** (12.91")
Length: **218mm** (8.58")
Pcs/SqFt: **1.28**
Approx Wt: **26 lbs/pc**

Medium Square

Thickness: **80mm** (3.125")
Width: **218mm** (8.58")
Length: **218mm** (8.58")
Pcs/SqFt: **1.92**
Approx Wt: **17.5 lbs/pc**

Small Rectangle

Thickness: **80mm** (3.125")
Width: **218mm** (8.58")
Length: **108mm** (4.25")
Pcs/SqFt: **3.84**
Approx Wt: **8.3 lbs/pc**
