

Murata™ Solido

Murata™ Solido

Since 2019, our beloved Murata™ family of wall blocks has been setting the standard in the industry. Yet, as time passed, it became clear that the family was not quite complete. And so, introducing the newest addition: Murata™ Solido. This beauty is tailor-made for creating a sturdy base for retaining walls, charming freestanding structures, petite vertical walls, and many other delightful outdoor living accents. With the same dimensions as the original Murata™, it seamlessly blends in, creating a cohesive and inviting space. Welcome to the family, Murata™ Solido!

Composition and Manufacture

Murata™ Solido is made from a low moisture concrete mixture. It is made under high pressure and high frequency vibration, producing a very dense block, low in water absorption (less than 7%) and high in compressive strength PSI (above 3000). It is designed to meet or exceed ASTM C-1372 specifications.

Dimensions:

Height: **200mm** (7.87")
