

Largo Stone™

Largo Stone™

Large, modern pavers are all the rage right now, with a clear preference for bigger sizes. In response to this growing demand, we are excited to introduce Largo Stone™. This new paver retains the classic 2:1 brick aspect ratio but in a much larger size. Featuring a crisp, smooth finish and beveled edges, Largo Stone™ seamlessly complements both classical and modern architecture. Its 60mm thickness ensures compatibility with our other smooth finish pavers, like the Leiden Collection. We are thrilled about this new addition and confident you will be too!

Composition and Manufacture

Largo Stone™ is made from a low moisture concrete mixture. It is made under high pressure and high frequency vibration, producing a very dense stone, low in water absorption (less than 5%) and high in compressive strength PSI (above 8000). It is designed to meet or exceed ASTM C-936 and ASTM C-67 (freeze/thaw) specifications.

Dimensions:

Thickness: **60mm** (2.36")
Width: **460mm** (18.12")
Length: **920mm** (36.25")
Pcs/SqFt: **.22**
Pcs/Pallet: **16**
Approx Wt: **122 lbs/pc**
