

# Leiden Multi Stone

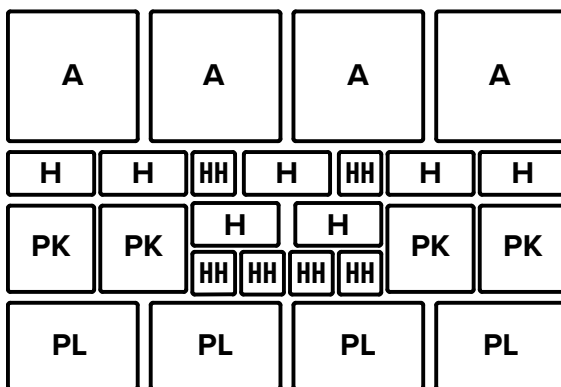

## Leiden Collection

A family of stones inspired by art! Our Leiden Collection has proven to be a popular option, both with customers and contractors. The Dutch city of Leiden that this collection is named after was where the geometric De Stijl (de-stile) art movement was born. Not surprisingly, the most popular display of the Leiden collection is the geometric five-stone pattern or the random layout. This stone family is a unique favorite!

## Composition and Manufacture

Leiden Collection is made from a low moisture concrete mixture. It is made under high pressure and high frequency vibration, producing a very dense stone, low in water absorption (less than 5%) and high in compressive strength PSI (above 8000). It is designed to meet or exceed ASTM C-936 and ASTM C-67 (freeze/thaw) specifications.

## Pallet Layout

## Dimensions:

Thickness:	<b>60mm (2.36")</b>
Width:	<b>various</b>
Length:	<b>various</b>
SqFt/Pallet:	<b>96</b>
Layers/Pallet:	<b>10</b>
Approx Wt:	<b>292 lbs/layer</b>
